FW Winder

Winding of film and nonwoven

The Roll-o-Matic FW winder has been developed for winding the web into flat sheets. The multiple folded film is used for applications such as dust sheets, table cloths and garden covers – supplied in flat packs.

The FW winder is available for both in-line and out-of-line operation. Web cutting is done in stop position, meaning that the web will be cut cleanly and at right-angles to the film edge, even with heavy gauge films.

Technical data for FW

| | |
|------------------------------|------------------------|
| Min. width of finished pack | 200 mm (7.9 in) |
| Max. width of finished pack | 400 mm (15.7 in) |
| Min. length of finished pack | 160 mm (6.3 in) |
| Max. length of finished pack | 300 mm (11.8 in) |
| Max. film speed* | 120 m/min (395 ft/min) |
| Max. cycles | 12/min |

*) Depending on film quality and thickness.
Additional equipment: Unwinder, perforator, folding equipment and automated packaging equipment.

FW Winder

At Roll-o-Matic we always focus on your production demands - therefore all Roll-o-Matic developments are customer-driven and customer-oriented.

The FW-series has been developed according to our customers' requirements for stable, user-friendly and easy to operate winding, where the key parameters are: modest investment, stability, outstanding performance and Return on Investment.
