W 500 Winder

Fully automatic winding of bags or film

The W 500 is a reliable and easy-to-operate solution for efficient winding of bags or film. It operates with small-diameter winding pins to produce tight, uniform rolls and is available as a stand-alone unit or as part of a Roll-o-Matic converting line.

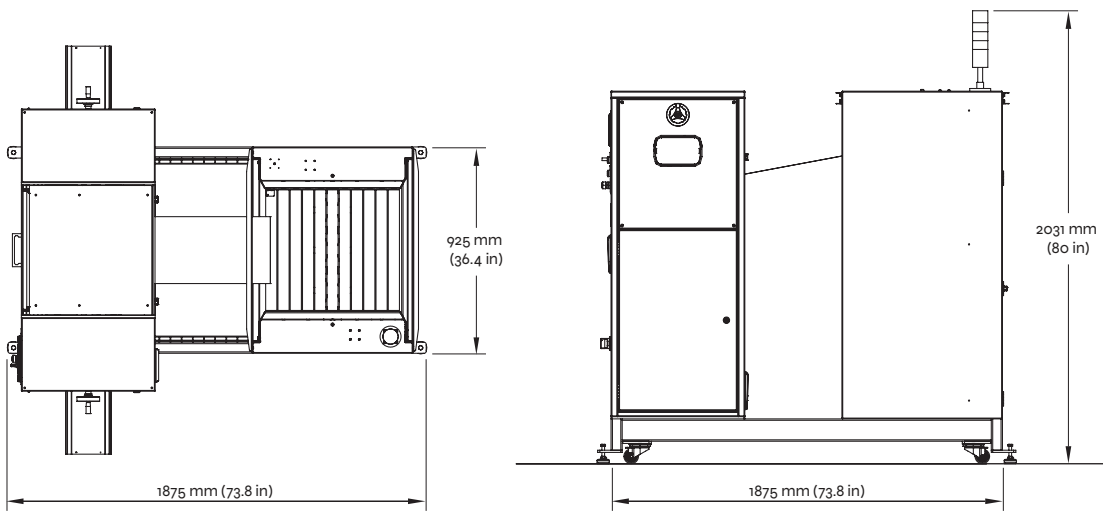

The W 500 can run in-line with an extruder or out-of-line with an unwinder. It is available in two versions to match different production requirements, including a version specially developed for in-line production.

- Optional add-ons:
- Perforation.
 - Closing of finished rolls with hot melt, label or gummed paper tape.
 - Safety light curtain for enhanced workplace safety.
 - Wheels/casters for easy repositioning.
 - Plug/socket for fast and easy connection.
 - Remote connection for easy support.

Technical data for W 500

	W 500/10	W 500/8
Min. winding width	120 mm (4.7 in)	120 mm (4.7 in)
Max. winding width	500 mm (19.7 in)	500 mm (19.7 in)
Max. roll diameter	200 mm (7.9 in)	200 mm (7.9 in)
Max. film speed*	120 m/min (395 ft/min)	80 m/min (260 ft/min)
Max. roll changes	10/min	8/min

*) Depending on film quality and thickness, as well as bag length.

W 500 Winder

Designed for flexible production

Proven with the Compact line

The W 500 is a reliable winding solution for Roll-o-Matic's Compact line, providing automatic coreless winding of finished bags.

Developed for in-line production

The W 500/8 has been specially developed for in-line production, where high winding speeds are typically not required. It combines reliable automatic winding with the performance needed for typical in-line applications – without unnecessary complexity.
