

Roll Carton Packer

Automatic packaging

Additional module to your Roll-o-Matic roll-bag line. For a more automated production of bags on rolls.

- Automatic packaging of finished rolls in boxes
- Up to 30 rolls/min

Carton Packer with Delta line

Bags in a box

Roll Carton Packer

Roll-bag Converting

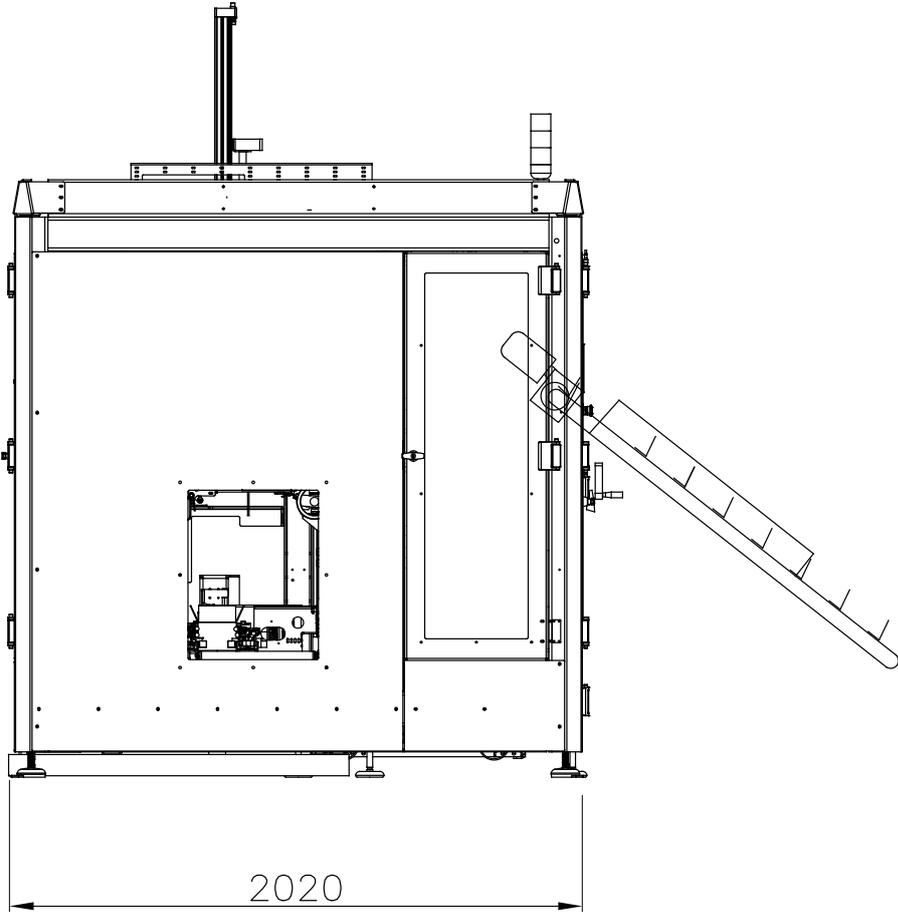

Packing of bags on roll can be a potential bottleneck due to the high output from Roll-o-Matic bag machines. The Roll Carton Packer is an efficient solution for automatic packing of the finished rolls in carton boxes. The Roll Carton Packer is installed after the winder and includes feeding conveyers, a cardboard case erector,

a taping unit for closing the bottom of the box and a system for packing the rolls into the box. It is possible to add a case closer and a transport conveyor after the Roll Carton Packer, for an even more automated production.

Technical data for Roll Carton Packer

Min. case size	200 x 150 x 100 mm (7.9 x 5.9 x 3.9 in)
