

Roll-o-Matic

**We are number
one in roll-bag
solutions**

{ roll-o-matic.com }

Roll-o-Matic is an international pioneer and market leader in the manufacturing of high-end solutions for the production of bags on roll (perforated or interleaved), plastic film products and other related items.

Dedicated specialists in innovative, long-life solutions, we help our customers increase their production capacity and achieve a higher level of automation, accuracy and efficiency – all prerequisites of a good, sustainable business.

Since its start in 1967, Roll-o-Matic has developed, installed and serviced thousands of roll-bag solutions in more than 60 countries. Our machines are known for their user-friendliness, high efficiency and for being a future-proof investment. This is how we have become number one in the world market.

**Danish innovation
sets the standard worldwide**

“We have been dealing with Roll-o-Matic for over 20 years, using their excellent machines. It is not just the new state of the art winding equipment, but their after sales service is second to none. With Roll-o-Matic’s help we have become one of Europe’s largest plastic recycling companies and I can’t recommend them, as a company, enough.”

Doug Mercer
Managing Director
Frank Mercer & Sons, United Kingdom

“It is very important to us that the production lines are easy to operate, and we also want to have a high degree of automation. We have purchased several Roll-o-Matic Delta lines in the past and are very pleased with their performance, quality and service. Based on our positive experience, we are confident in Roll-o-Matic for future purchases.”

Gerry Maldoff
President
Hymopack, Canada

“We chose a Roll-o-Matic line because of the high production speed and the flexibility of the modular concept, which facilitates machine customization both now and in the future. Besides, Roll-o-Matic has a reliable Customer Care service and both sales and technical staff are very cooperative and do their best to achieve customer satisfaction.”

Walled Al Osaimi
Owner
Rema Factory for Plastic Products, Saudi Arabia

Number One roll-bag and winder machines

Roll-o-Matic develops efficient and modular solutions for the production of bags on a roll and industrial film. They are designed to meet individual production requirements and changing needs.

- High speed, capacity and performance
- Versatile and modular equipment
- Automated workflow

Roll-o-Matic develops production lines that are built to last. No machine leaves Danish soil until it has been thoroughly tested and documented by our skilled engineers. The installation is left in the expert hands of our service engineers, who take care of the commissioning of the machinery in Europe, the Middle East, North America, Africa, Latin America

and Asia. We have been doing this for more than 50 years, during which time Roll-o-Matic has been at the forefront, supplying several thousands of production lines to the film and bag industry for consumer, agricultural, construction and industrial applications, to name a few.

Our high performance SMARTsolutions are efficient, versatile and durable, and can save you from costly production stoppages.

Delta

Delta is a state-of-the-art solution for high-speed production of all kinds of bags: Bottom-sealed, side-sealed, star-sealed, wave top, T-shirt, star-sealed T-shirt and draw tape bags.

→ Max. speed 200 m/min (650 ft/min)

→ Up to 600 bags/min/lane

} All kinds of bags on roll in 1, 2 or more lanes }

HMW

The High-speed Multilane Winder is a high-speed fully automated winder to service bag machines and other applications. It is possible to run single or multilane, up to 6 lanes.

→ Max. film speed: 220 m/min (720 ft/min)

→ Max. roll changes/lane: 7/min

} High-speed Multilane Winder
For winding of bags or industrial film on
cores in up to 6 lanes }

Omega

The Omega series is designed for dedicated production of thin gauge bottom sealed and star sealed bags at very high speed and cycles. The drum sealing technology gives you the possibility of making high-quality sealing in thin gauge film at very high speed.

→ Max. speed 220 m/min (720 ft/min)

→ Up to 880 bags/min/lane

→ Up to 6 lanes

} For high-speed production of bottom and
star-sealed bags on roll with thin gauge
film in up to 6 lanes }

RW

The Roll Winder series is designed especially for medium and heavy gauge film, nonwoven and similar. The RW winder can be set up in-line with an extruder or out-of-line with an unwinder. Winding on cores or coreless. The cores require no tape or similar pre-gluing.

→ Max. film speed 120 m/min (395 feet/min)

→ Max. roll changes 4/min

} For automatic winding of medium and
heavy gauge film, nonwoven or similar
webs, with or without cores }

Compact

For production of bottom sealed and star sealed bags on rolls in 1 lane. The Compact is mainly targeted at medium capacities. It is the perfect choice for in-line applications, where the extruder is the bottleneck, and for shorter length refuse and produce bags.

→ Max. speed 120 m/min (395 ft/min)

→ Up to 250 bags/min

} For production of bottom or star-sealed
bags on roll in 1 lane. Ideal for medium or
heavy gauge film. }

HRW

High-speed Roll Winder is a high-speed roll winder for winding of flat single-layer, tubular or folded industrial film or similar web applications. Winding can be done with or without cores.

→ Max. film speed 220 m/min (720 ft/min)

→ Max. roll changes 16/min

} High-speed Roll Winder
Optimal solution for high-speed winding of
small diameter rolls, with or without cores }

Number one sustainable solutions

Roll-o-Matic develops efficient and modular solutions, which are designed to meet individual production requirements and changing needs. This makes it possible to put together a sustainable, versatile and future-proof production line.

Low energy
consumption

Long-life
solutions

Production with
PCR or bio film

We help our customers to produce more sustainably. Roll-o-Matic's SMARTsolution allows you to produce in recycled plastic and use thinner films, reducing resource consumption and waste.

Your production thus makes a positive contribution to the utilisation and recovery of resources, reducing the carbon footprint and benefiting future generations.

All machines are able to run recycled films and have the lowest possible resource consumption and waste.

Number one customer care

We enjoy very strong relationships with all our customers and partners, and have an acute sense of responsibility.

- Experienced staff
- Specialized engineers
- High level of service

{ Roll-o-Matic's customer care programme includes }

On-site
service

Commissioning

Employee
training

Preventive
maintenance

Support

Spare parts
programme

Service
inspections

Roll-o-Matic

At Roll-o-Matic, we strive to provide excellent service and advice from the start of the sales phase and throughout the life of the equipment. This comes with certain obligations and requires an understanding of the business, trust and a high level of service.

Our experienced team of specialist engineers and technicians is your back-up team online or on site. We take pride in keeping your production line running and efficient.

Our most important task is to equip you to grow your business.
Because your success is our success.
