Omega F Air Cushions

Production of air cushions on roll at high speed

The Omega F has been developed for ultra-high-capacity production of air cushions. It allows significant reduction of production costs compared with conventional technologies for air cushion production.

- Continuous motion sealing/perforation
- Production speed up to 492 ft/min (150 m/min)
- Up to 2-lane production
- Excellent price/performance ratio

Capacity Examples

| Product | Cushions/min/lane | Lanes | Total cushions/min |
|------------|-------------------|-------|--------------------|
| 6" cushion | 1000 | 2 | 2000 |
| 8" cushion | 750 | 2 | 1500 |

Omega F Air Cushions

At Roll-o-Matic we always focus on your production demands - therefore all Roll-o-Matic developments are customer-driven and customer-oriented.

The OMEGA-series has been developed according to our customers' requirements for user friendly and easy to operate high capacity line where the key parameters are: stability, dedicated production and outstanding performance.
